

FLETCHER 2200 SERIES MAT CUTTER

When precision and accuracy are important, this is the mat cutter you need for sizing cuts, bevel cuts, and V-grooves.

It has a unique pin locator that makes setting precise, accurate borders easier than ever with faster repeat cutting. The 8" wide border slices through foamboard up to 1/2" thick.

The 2200 has a strong and straight anodized aluminum base that won't warp for years of uninterrupted operation. It also offers comfort grips with easy load magnetic blades that lock for a secure cut.

2-year manufacturer's warranty.

| BL016F | FLETCHER .015 SINGLE EDGE BL./100 PK. |

FLETCHER 3000 SERIES MAT CUTTER

One cutter meets all of your matting and framing needs. The spring-loaded, triple-turret cutting assembly has a patented roller design and three cutting tools. The turret device makes it easy to switch from scoring and breaking out glass or plastic, to cutting matboard – even foamboard – up to 1/4" (6 mm) thick.

It mounts easily to the wall to save space. A full-length clamp provides top-to-bottom, non-slip, mark-free clamping. Composite sleeve bearings reduce friction for accurate scoring and cutting. Optional measuring stops allow for quick, same-size cutting.

Five year manufacturer's warranty.

CASESSE MITERING CHOPPER

This Mitre Guillotine has been developed to give the gallery picture framer and volume framer both speed and quality cutting. The foot pedal operation brings the blades down to chop through the moulding producing 2 opposite mitres. A re-positionable cutting head allows you to advance the blades and chop through the moulding as many times as is needed to provide the best quality cut. Comes with one set of blades. Secondary sets are recommended for continuous operation during blade sharpening.

CLEARMOUNT MEASURING SCALES

- Compatible with 10" and 12" Miter Saws - including compound and sliding compound saws. The markings on the scale are silk screened and guaranteed not to wear off.
- Uses a one piece, heavy gauge aluminum extrusion that mounts to the top of the saw table which guarantees you a level bed.
- Units are shipped preassembled - mounting to your saw is fast and easy.
- 2 adjustable (vertically & horizontally) clamps run along a channel in the front part of the scale - These clamps hold the moulding by pushing it back against the fence

| CODE | DESCRIPTION |
|--------|--|
| SW6-1 | 6' MEASURING SCALE - measures 41" one side only (left or right). |
| SW7 | 7' MEASURING SCALE - measures 41" each side of saw. |
| SW7-1 | 7' MEASURING SCALE - measures 64" one side only (left or right). |
| SW11 | 11' MEASURING SCALE - measures 64" each side of saw. |
| SW11-2 | 11' DOUBLE MITRE SAW SCALE - for 2 saws, measures 64" on one side. |

CLEARMOUNT COMPLETE SYSTEMS

The Clearmount Complete System Includes:

- The Clearmount mitre Saw table with exclusive ACCU-MITER scales.
- The Makita LS1030 Power Mitre Saw.
- Special 10 inch carbide tipped saw blade for multi-purpose cutting.
